Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/764,871

Applicant(s)

SHIEH, TONG-WEN

Examiner

Zachary M. Pape

Art Unit

2835

— The MAILING DATE of this communication appears on the cover sheet with the correspondence address —
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 January 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 27 January 2004 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Cheng (US 2003/0043548) in view of Jang (US 2004/0257764) and further in view of Wang (US 2004/0066622).

With respect to claim 1, Cheng teaches a heat dissipating system of a personal computer having a heat dissipating unit; the heat dissipating unit including a power supply; the power supply including a housing and a cover (Generally 22); a circuit (26) and a turbine fan (21) being placed in a space formed by the housing and cover (As illustrated in Fig 3), the turbine fan having a casing and a set of blades (As illustrated in Fig 5); one lateral side of the turbine fan having an air outlet (213); one side of the housing of the power supply having air outlets (220), receptacles (23'), and a power switch (Below 220 as illustrated in Fig 4); another side of the housing of the power supply having a plurality of holes (Behind 21 and 28, See Fig 4) arranged like a net; wherein the turbine fan dissipates heat generated from the power supply and the personal computer so as to dissipate heat rapidly. Cheng fails to teach that the fan is a double suction turbine fan including upper and lower air inlets. Cheng fails to further teach that the cover of the power supply has a round hole corresponding to the air inlet.

Jang teaches the use of a double suction turbine fan (20) with upper (221) and lower (217) air inlets. It would have been obvious to one of ordinary skill in the cooling art at the time the invention was made to combine the teachings of Cheng with the teachings of Jang to minimize turbulence flow, reduce noise, and improve efficiency (Paragraph 15).

Additionally, Wang teaches the conventionality of placing a round hole (45) in the cover of a power supply corresponding to an air inlet of a fan (60). It would have been obvious to one of ordinary skill in the cooling art at the time the invention was made to supply an additional air inlet near the fan to provide an additional means for air to enter the housing to prevent the fan from "starving" due to lack of available airflow. Allowing a fan to "breathe" properly increases its efficiency, longevity, and reduces un-necessary repairs.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Zachary M. Pape whose telephone number is 571-272-2201. The examiner can normally be reached on Mon. - Thur. & every other Fri. (8:00am - 5:00pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynn Feild can be reached at 571-272-2092. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
